## **DETAILED ACTION**

## Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

**Species 1**, identified by Figures 1, 2, 9 and 4, describes the structural form of the driving circuit of the display device, which includes a source signal line driving circuit, and a current source for a level shifter disposed in the division units of the source line driver. The source signal line driving circuit also includes shift registers, NAND circuits, buffers, NOR circuits, first latch circuits, and second latch circuits.

**Species 2,** identified by Figure 3, describes another structural example of the source signal line driving circuit of the display device which includes all of the components of the source line driver of Species 1 and further includes analog switches, and inverters.

**Species 3**, identified by Figures 5, 6, 8, and 17, describes the operation of the level shifter power source in the driving circuit, wherein this embodiment operates differently from that which is explained with reference to species 1 and 2 (see page 22, last paragraph).

**Species 4**, identified by Figures 7 and 8(B), describes a method for supplying the current during level conversion at the timing bridging each unit, that is different from the method of species 2 (see page 24, paragraph 1 and 2).

Application/Control Number: 09/970,929

Art Unit: 2675

**Species 5**, identified by Figures 5 and 11-14, describe simultaneously forming TFTs of the pixel portion and a driver circuit portion provided in a periphery of the pixel portion in the display device.

**Species 6**, identified by Figures 15 and 16, describes various electronic device incorporating the display device of the invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, *claims 1 and 37* are generic.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Art Unit: 2675

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

## Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alecia D. Nelson whose telephone number is (703) 305-0143. The examiner can normally be reached on Monday-Friday 9:30-6:00. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
